## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: reference number 13 in figure 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to because through out applicant specification and figures 1-5C and 6B, reference number 141 refers to a guiding slot, however, in figure 6A, reference number 141 refers to a different portion of the invention. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the

remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. In addition to Replacement Sheets containing the corrected drawing figure(s), applicant is required to submit a marked-up copy of each Replacement Sheet including annotations indicating the changes made to the previous version. The marked-up copy must be clearly labeled as "Annotated Sheets" and must be presented in the amendment or remarks section that explains the change(s) to the drawings. See 37 CFR 1.121(d)(1). Failure to timely submit the proposed drawing and marked-up copy will result in the abandonment of the application.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Siahpolo et al. (5481431). With respect to claims 1 and 2, Siahpolo et al. teaches a disk drive anchoring mechanism adopted for using on a computer casing (1) comprising a plurality of fastening elements (58) located on two opposite sides of a disk drive (6); a bracing board (60) fixedly mounted on the computer casing (1) for holding the disk drive (6); at least two latch flanges (66A, 66B) located on the bracing board (60) corresponding to the two opposite sides of the disk

Art Unit: 2835

drive (6) and sandwiched the disk drive (6) therebetween through the fastening elements (screw 58); and a drawing rack (40) movably coupled with the latch flanges (66A, 66B) to confine the fastening elements (58) to anchor the disk drive (6), wherein the fastening elements (58) are screws which are fastened to screw holes formed on the two opposite sides of the disk drive (6) as claimed (see for example figures 1-8D).

***Allowable Subject Matter***

6. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: as to claim 3, patentability resides, at least in part, in the latch flanges having a guiding section, the drawing rack having a guiding slot corresponding to the guiding section, the guiding slot being movable along the guiding section to allow the drawing rack to be movably coupled with the latch flanges, in combination with the other limitations of the base claim; as to claim 4, patentability resides, at least in part, in the latch flanges having an anchor slot, the drawing rack having an indented trough corresponding to the anchor slot and a channel slot such that the fastening element is slidable into the bottom end of the anchor slot and the channel slot through the anchor slot and the indented trough, and the drawing rack is movable through the channel slot over the fastening element to confine the fastening element at the bottom end of the anchor slot to anchor the disk drive, in combination with the other limitations of the base claim; as to claim 5, patentability resides, at least in part, in the latch flanges has a housing section to allow the drawing rack to be movably coupled with the latch flanges, in combination with the other limitations of the base claim.

**Conclusion**

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please note the teachings of Lajara et al. (5192143), Konno et al. (6075695), Liao (6256195), Chao et al. (6351378), Hartung et al. (6795309), Tucker et al. (6625014), and Huang (20020181197).
